"Right2View" Security Overview

Advanced Medical Records Inc
Enabling Secure Electronic Medical Records Storage & Access

Web Hosting over 25 Million Medical records and reports for Hospitals, Clinics and Physician Practices

sales@advancedmedrec.com

979.220.0060

Practices, Clinics, Hospitals

Release of Information (ROI)
EOB Consolidation & Expediation
Patient File Scanning & Hosting

"Right2View" Overview

AMR is the world's largest digital document repository for medical and healthcare institution reports and patient files. The issue of security and HIPAA compliance relative to **Electronic Medical Records (EMR)** is a key issue in today's rapidly evolving world of Healthcare technology.

AMR's unique **PIN** number access for 3D Logon security and patented **"Right2View"** document encryption technology ensure our unique 100% **HIPAA** compliant **ROI** solution.

PIN number protection is trusted by financial institutions and their consumers to conduct millions of secure bank ATM transactions daily. Review all of our services at www.advancedmedrec.com

EMR Security Overview

Job positions with broad, random functions may require electronic access to at least select portions of all patients' medical files. Without such access, employee and provider effectiveness could be significantly compromised.

For paper records, a locked file room and record-request system provide control over the physical record, but these measures offer no control over what is viewed. HIPAA compliant access must incorporate a secure **"Right2View"** component.

For EMR systems, access may be controlled and monitored, but it is much more difficult to control and defend when random access is required. Decisions to grant broad access should be carefully evaluated and justified.

Unlike paper records, where evidence of inappropriate viewing can be nonexistent, computerized audit logs of **EMR** access make tracking possible.

Security audits use audit trails and audit logs to compare actual system activity to expected activity. An audit can be required as a result of a patient complaint or suspicion of employee wrongdoing.
