Patient File Scanning & Hosting

AMR

Why Outsource ROI?

The **Release of Information (ROI)** process is a significant, time consuming, administrative burden on health information management professionals.

In addition, new **HIPAA** regulations add more labor to the process, making **ROI** more problematic for facility staff.

Let **AMR's** experienced, well-trained, professional staff relieve your administrative responsibility by outsourcing your ROI needs.

AMR offers onsite **ROI** services to rapidly and accurately capture and transfer requested patient information using the most secure **HIPAA** compliant technology available today. Review our services at www.advancedmedrec.com.

AMR

What Are The Benefits?

Better control of the **ROI** process

Elimination of reproduction/mailing costs and associated staff distractions

Enhanced requestor relations

A detailed, simple to use logging and tracking system for both the provider and the requestor

Reduced in-bound **ROI** status calls

Guaranteed **HIPAA** compliance

Workflow designed such that staff can ensure that current authorization language is included in each request letter and authorization

User access is controlled by patented **PIN** number "**Right2View**" technology

AMR

Quality Assurance Program

Our Total Quality Management Program provides for thorough and ongoing analysis of our **ROI** performance. The **TQM** program was designed by credentialed **AMR** staff in conjunction with **HIPAA, CMS, JCAHO** and clinical practice guides.

AMR is the world's largest digital document repository for medical and healthcare institution reports and patient files. **AMR's** unique **PIN** number access for 3D Logon security and patented "**Right2View**" document encryption technology insure our unique 100% **HIPAA** compliant **ROI** solution.

PIN number protection is trusted by financial institutions and their consumers to conduct millions of secure bank ATM transactions daily. **AMR** healthcare process know-how and patented security technologies are the reasons why **AMR** is the preferred choice for digital document management for major Healthcare institutions and physician practices.
